

**Applications & Case Studies**

105	<b>Evaluating Frequency Regulation operated on two Stationary Energy Systems with Batteries from Electric Vehicles</b> Tam Nguyen & Michaela Bauer, TU München/ETH Zürich, <i>Germany/Switzerland</i>
112	<b>Design and Fabrication of a Parabolic Trough Collector and Experimental Investigation of Direct Steam Production in Tehran</b> Hossein Akhbari, Shahid Beheshti, <i>Iran</i>
113	<b>Exploitation of demand side management in water supply for integrating Renewable Energies</b> Hedda Gardian, Fraunhofer IWES, <i>Germany</i>
118	<b>Model Predictive Control of Air-to-Water Heat Pump Heating Systems with Thermal Energy Storage</b> Sebastian Kuboth, Universität Bayreuth, <i>Germany</i>
122	<b>Design And Operation Of A Solar Thermal System With An Integrated Concrete Storage</b> Agnes S.N. Widjaja, TH Brandenburg, <i>Germany</i>
134	<b>Integration of sorption heat storage in a heating network coupled with an ORC system: a techno-economic investigation</b> H.A. Zondag, Energy Research Centre of the Netherlands ECN, <i>The Netherlands</i>
158	<b>Simulation-based Investigation Of Energy Management Concepts For Fuel Cell – Battery – Hybrid Energy Storage Systems In Mobile Applications</b> Catrin Weyers, TU Dresden, <i>Germany</i>
171	<b>Passive Hybrid Storage Systems: Influence of Circuit and System Design on Performance and Lifetime</b> Thorsten Grün, Karlsruhe Institute of Technology/ Institute of Nanotechnology - Competence E, <i>Germany</i>
177	<b>Corrosion In Water circuits - A Field Studie</b> Mani Zargari, SIZenergie+, <i>Germany</i>
207	<b>Closing the gap between valuation and realized value of energy storage systems: A controls systems approach</b> Andres Cortes, Electric Power Research Institute, <i>USA</i>
212	<b>Utilization of Local Flexibility to (Dis-)Charge a Battery Providing Frequency Regulation</b> Julian Rominger, FZI Forschungszentrum für Informatik, <i>Germany</i>
217	<b>Solar- and Windpower-based Nitrogen Fertilizer and Ammonia Fuel Production - Operation Flexibility and Optimal Configuration of Local Production</b> Robert Weiss, VTT Technical Research Centre of Finland, <i>Finland</i>
219	<b>Multifunctional Materials for 3D Printed Customizable Footwear</b> Daniele Rigotti, Associazione Italiana di Scienza e Tecnologia delle Macromolecole, <i>Italy</i>
220	<b>Application Of Rechargeable Batteries Of Electrical Vehicles As Time Dependent Storage Resource For The Public Electricity Grid</b> Gerhard Kleiss, Institute of Electrotechnology, Leibniz Universität Hannover, <i>Germany</i>
223	<b>A Mobile Hydro-Generation/Storage Device</b> Jalal, Baghdadchi, Alfred University, <i>USA</i>
224	<b>Future Municipal Thermal and Electrical Energy Storage Demand</b> Anette Anthrakidis, FH Aachen/Solar-Institut Jülich, <i>Germany</i>
226	<b>Energy Management and Control Systems for Small Scale Wind-Diesel-Compressed Air Hybrid System</b> Hussein Ibrahim, Université du Québec à Rimouski/Cégep de Sept-Îles, <i>Canada</i>
240	<b>Analysis of Energy Storage from the Radiation Balance Estimate in the Island of Itapessoca, Goiana, Pernambuco, Brazil</b> Hernande Pereira Silva, UFRPE and IFPE, <i>Brazil</i>
249	<b>Ressources-Efficient Long Term Storage Options By The Integration of Fluctuating Renewable Energies On WWTPS</b> Oliver Gretzschel, TU Kaiserslautern Institute WIR, <i>Germany</i>
259	<b>Integration of Renewable Gases into the Gas Market: A Nonlinear Optimization Approach</b> Sebastian Kolb, FAU Erlangen-Nürnberg, <i>Germany</i>

**Batteries**

114	<b>Constant power discharging of Li-ion cells for application oriented aging forecasts</b> Karen Derendorf, DLR Institut für Vernetzte Energiesysteme e.V., <i>Germany</i>
116	<b>Operational Strategy for Improved Energy Efficiency of Battery Storage Systems</b> Michael Schimpe, TU Munich, <i>Germany</i>
204	<b>Market Potential Analysis and Life Cycle Assessment of Modular Battery Systems for Multiple Applications</b> Dennis Wilken, DLR Institut für Vernetzte Energiesysteme e.V., <i>Germany</i>
255	<b>Cooperative Control and Economic Assessment of Residential Battery Storages in Microgrids</b> Holger Hesse, Technical University of Munich, <i>Germany</i>
260	<b>Modelling of the Gassing and Oxygen Recombination Process in VRLA (Gel) Battery at 25 Degree Celsius</b> Jibrán Hayat, ISEA RWTH Aachen, <i>Germany</i>

**Thermal Energy Storage**

124	<b>Thermal Stability Enhancement of D-Mannitol for Latent Heat Storage Applications</b> Dominik Burger, Fraunhofer ISE, <i>Germany</i>
125	<b>Integration of a Thermochemical Storage System in a Rankine Cycle Driven by Concentrated Solar Power: a Conceptual Study</b> Lingai Luo, LTEN CNRS, <i>France</i>
131	<b>Properties of Reversible Heatpump-ORC Energystorage Systems for Baseload Generation</b> Daniel Scharrer, Friedrich-Alexander-Universität Erlangen-Nürnberg, <i>Germany</i>
149	<b>Characterisation Of A Heat Exchanger Based On FracTherm® Plates For Latent Heat Storage of Process Heat</b> Franziska Klünder, Fraunhofer ISE, <i>Germany</i>
151	<b>Simulation of High Temperature Thermal Energy Storage in Rock Beds</b> Michael von der Heyde, Hamburg University of Technology, <i>Germany</i>

162	<b>Corrosion of Alloys in Molten MgCl<sub>2</sub>/KCl/NaCl for High-Temperature Thermal Energy Storage</b> Wenjin Ding, German Aerospace Center (DLR), <i>Germany</i>
174	<b>Low Temperature Thermal Energy Storage/release Of Phase Change Nanocomposite Materials</b> Andrea Dorigato, University of Trento, <i>Italy</i>
176	<b>Thermal Conductivity Measurements For Impregnated PCM</b> H.A. Zondag, Energy Research Centre of the Netherlands ECN, <i>The Netherlands</i>
199	<b>Compactness Increase of a Thermochemical Storage System by Prismatic Shaped Containment</b> Samuel Knabl, AEE INTEC, <i>Austria</i>
209	<b>Highly Proton Conductive And Thermally-mechanically Stable Nanocomposite Membranes Based On Sulfonated Polyether Sulfone For Fuel Cell Application</b> Morteza Moradi, Shahid Chamran University of Ahvaz, <i>Iran</i>
210	<b>Analysis of uncertainty sources in the CFD simulation of a latent thermal energy storage unit</b> Andreas König-Haagen, Universität Bayreuth, <i>Germany</i>
232	<b>The Progress in the Use of Energy Storage in Kuwait</b> Ayeshah Mohammad Alwadh, University of Colorado, <i>USA</i>
234	<b>Experimental Results of a Large Scale Single Tank Thermocline Storage System</b> Christian Odenthal, German Aerospace Center (DLR), <i>Germany</i>
243	<b>Analytical Approximations for the Closure Time of Freezing Processes in Spheres and Cylindrical Tubes with a Nanofluid Case Study</b> Khaled Hamed Mohammed Al-Hamed, King Fahd University of Petroleum and Minerals (KFUPM), <i>Saudi Arabia</i>
246	<b>Thermochemical Energy Storage Chemistries and Reactor Concepts for Integration in Solar Thermal Power Plants</b> Christos Agrafiotis, German Aerospace Center (DLR), <i>Germany</i>
262	<b>Experimental Results of a Single-Tank Molten Salt Thermal Energy Storage Prototype</b> Martin Karl, Fraunhofer ISE, <i>Germany</i>
<b>Flexibility Options</b>	
156	<b>The Impact Of E-mobility In A Future Energy System Dominated By Renewable Electricity</b> Jan Michalski, Ludwig-Bölkow-Systemtechnik, <i>Germany</i>
165	<b>Biomaterial Based Toxic Gas Sensor Using Microwave Resonant Cavity</b> Sahib Babae Tooski, Azad University Malayer, <i>Iran</i>
195	<b>Combining Floating Solar Photovoltaic Power Plants and Hydropower Reservoirs: A Virtual Battery of Great Global Potential</b> Francisco Javier Farfan Orozco, Lappeenranta University of Technology, <i>Finland</i>
231	<b>Impact of Renewable Energy Prediction's Time Frame on The Performance of a Hybrid Power Generation System</b> Mazen Ghandour, Lebanese University, <i>Lebanon</i>
248	<b>Biological Methanation in A Trickle-Bed Reactor</b> Tobias Weidlich, FAU Erlangen-Nürnberg, <i>Germany</i>
257	<b>Development of a Highly Dynamic Power-to-Heat-to-Power-to-Power Experimental Plant for Large Scale Storage</b> Alexander Zaczek, Siemens Wind Power GmbH & Co. KG, <i>Germany</i>
<b>PV Home Storage</b>	
139	<b>Photovoltaic Energy Storage Systems Aging: From Cell Aging to Battery System Aging</b> Joaquín Klee Barillas, Zentrum für Sonnenenergie- und Wasserstoff-Forschung Baden Württemberg, <i>Germany</i>
168	<b>Country wide evaluation of electricity self-sufficiency of single family houses in Germany and Czech Republic</b> Luis Ramirez Camargo, TH Deggendorf, <i>Germany</i>
189	<b>Development of realistic demand profiles to increase PV self-consumption in households</b> Florian Samweber, Forschungsstelle für Energiewirtschaft e.V., <i>Germany</i>
192	<b>OptIStore: An Exhaustive Tool For an Optimized Sizing of Combined PV-Storage Systems</b> Davide Strepparava, SUPSI, <i>Switzerland</i>
218	<b>Power and Energy Management with Battery Storage for a Hybrid Residential PV-Wind System – A Case Study for Denmark</b> Daniel Stroe, Aalborg University, <i>Denmark</i>
<b>Security and privacy</b>	
141	<b>Energy Security and Energy Storage Technologies</b> Abdelrahman Azzuni, Lappeenranta University of Technology, <i>Finland</i>
247	<b>A Very Lightweight Authenticated Session Key Establishment Protocol in Smart Grid</b> Mahdi Tahavori, SPGC, <i>Iran</i>
<b>Electric Energy Storage</b>	
144	<b>Temporal Interpolation Of Gridded Solar Radiation Data Toward Detailed Evaluation Of PV Fluctuations</b> Daigo Hirooka, Waseda University, <i>Japan</i>
153	<b>PEM Electrolysis for Power-to-Gas: Potential of Hybridization wuth external Energy Buffer</b> Tim Weverinck, ZAE Bayer, <i>Germany</i>
256	<b>Pore-Network-Modeling for Microstructure Design of Redox Flow Batteries Electrodes</b> Andrea Gayon Lombardo, Imperial College London, <i>England</i>
261	<b>Techno-Economic Assessment of DARE System</b> Ignacio Martínez Giménez, ETSI Caminos, Canales y Puertos, Universidad Politécnica de Madrid, <i>Spain</i>
263	<b>Impact of decentralized Li-Ion Battery Storage on Statistics and Grid-Impact of Electrical-Vehicles</b> Joel Wenske, Centre for Solar Energy and Hydrogen Research Baden-Württemberg (ZSW), <i>Germany</i>
264	<b>Comparison of Optimization Solvers in the Model Predictive Control of a PV-Battery-Heat Pump System</b> Ronny Gelleschus, Technische Universität Dresden, <i>Germany</i>
266	<b>Dichromate Flow Batteries: A Breakthrough Grid-Level Energy Storage Technology</b> David Finkelstein, Grenoble INP, <i>France</i>
<b>Framework Conditions</b>	

148	<b>Policy Mix Analysis For Stationary Battery Storage Systems In The German Control Reserve And Power Exchange Markets</b> Mira Klausen, Leuphana University of Lüneburg, <i>Germany</i>
159	<b>Wind Speed Estimation Considering Temporal Anisotropy for Generating Synthetic Power Profiles</b> Kouki Hama, Waseda University, <i>Japan</i>
203	<b>Development of a Bidding Strategy for a Battery Storage to Participate in the German Secondary Balancing Power Market</b> Christopher Olk, ISEA RWTH Aachen, <i>Germany</i>
<b>Energy Supply Systems</b>	
146	<b>The Curtailment-Storage-Penetration Nexus In Energy Transition – An International Perspective On Selected Countries</b> Solomon Abebe Asfaw, Lappeenranta University of Technology, <i>Finland</i>
157	<b>Smart Operation of PV + Wind + Batteries in Isolated Power Systems in Kenya</b> Per Nørgaard, Technical University of Denmark, <i>Denmark</i>
170	<b>Determination Of Proton Conductivity of Phosphoric Acid Doped PBI-SrCeO3 Nanocomposite Membranes By A Developed Model For Use In High Temperature Proton Exchange Membrane Fuel Cell (HT-PEMFC)</b> Morteza Moradi, Shahid Chamran University of Ahvaz, <i>Iran</i>
172	<b>Assessment of Potentials for Renewable Island Systems Using a Modular Hybrid Storage Simulation Tool</b> Sebastian Zurmühlen, ISEA RWTH Aachen, <i>Germany</i>
230	<b>Nanocomposite membranes for high-performance PEM fuel cells</b> Khadijeh Hooshyari, Amirkabir University of Technology, <i>Iran</i>
245	<b>Sustainable Energy Generation through Waste Water: A Situation in the City of Lagos, Nigeria</b> Ajayi Timothy Oluwagbenga, Ogun State Institute of Technology, <i>Nigeria</i>
251	<b>Hydrogen From Renewable Energies for German Trains</b> Jörg Wirtz, ABO Wind AG, <i>Germany</i>
<b>Energy Efficiency</b>	
175	<b>Feature Extraction of NWP Data for Wind Power Forecast by Using 3D-Convolutional Neural Network</b> Kazutoshi Higashiyama, Waseda University, <i>Japan</i>
181	<b>Analysis of Peak Reduction in Multiple Areas Based on Electrical Power Interchange</b> Kota Tajiri, Waseda University, <i>Japan</i>
